Dallas-Fort Worth Area Employment — October 2014

Total nonfarm employment in the Dallas-Fort Worth-Arlington Metropolitan Statistical Area stood at 3,245,100 in October 2014, up 111,900 over the year, the U.S. Bureau of Labor Statistics reported today. From October 2013 to October 2014, local nonfarm employment rose 3.6 percent, well above the national increase of 2.0 percent. Regional Commissioner Stanley W. Suchman noted that among the 12 largest metropolitan areas in the country, Dallas ranked second in the rate of job growth and third in the number of jobs added. (See [chart 1](#) and [table 1](#); the Technical Note at the end of this release contains the metropolitan area definitions. All data in this release are not seasonally adjusted; accordingly, over-the-year analysis is used throughout.)

Chart 1. Total nonfarm employment, over-the-year net change in the Dallas metropolitan area and its divisions, October 2009–October 2014

Source: U.S. Bureau of Labor Statistics.

The Dallas-Fort Worth-Arlington Metropolitan Statistical Area consists of two metropolitan divisions – separately identifiable employment centers within the larger metropolitan area. The Dallas-Plano-Irving Metropolitan Division, which accounted for 71 percent of the area workforce, provided 79 percent of area growth with the addition of 88,200 jobs from October a year ago, an increase of 4.0 percent. The Fort Worth-Arlington Metropolitan Division, which accounted for the remaining 29 percent of the area workforce, added 23,700 jobs during the 12-month period, a 2.5-percent increase.

Industry employment

Professional and business services registered the largest annual gain among the Dallas-Fort Worth-Arlington supersectors, adding 32,300 jobs, a 6.5-percent rise since October 2013; nationally, employment was up 3.6 percent in this supersector. (See [table 1](#) and [chart 2](#).) Local growth in this supersector was particularly strong in the employment services industry which gained 16,400 jobs over the year, a 14.7-percent increase.

Trade, transportation, and utilities, the metropolitan area's largest supersector, added 31,500 jobs from October 2013. The local rate of job growth, at 4.9 percent, was more than twice the national rate of 2.2 percent. Wholesale trade led the local supersector growth with the addition of 14,200 jobs, followed by transportation and utilities which added 13,600 jobs, representing gains of 8.3 and 9.1 percent, respectively.

Mining, logging, and construction added 14,200 jobs locally, a 7.9-percent gain over the year. The rates of job growth for this supersector differed between the metropolitan divisions, as Dallas-Plano-Irving registered a 9.4-percent rise and Fort Worth-Arlington expanded by 5.0 percent.

Government added 10,700 jobs between October 2013 and October 2014, increasing at a 2.7-percent pace locally compared to 0.4 percent nationally. Expansion in Dallas's public sector employment occurred in the state government and local government jurisdictions as federal government employment declined over the year.

Chart 2. Total nonfarm and selected industry supersector employment, over-the-year percent change, United States and the Dallas-Fort Worth-Arlington metropolitan area, October 2014

Source: U.S. Bureau of Labor Statistics.

Employment in leisure and hospitality rose by 9,700 from October 2013, an increase of 3.0 percent. Dallas-Plano-Irving added jobs in this industry at a 3.5-percent pace and Fort Worth-Arlington experienced an increase of 2.0 percent. Nationwide, leisure and hospitality employment rose 2.8 percent during the period.

The local education and health services supersector added 7,400 jobs since October 2013, an increase of 1.9 percent compared to the national gain of 2.1 percent. Most of the local expansion occurred in the Dallas-Plano-Irving metropolitan division which added 6,000 education and health services jobs, rising at a 2.2-percent pace.

Two other local supersectors recorded employment gains of at least 1,000 from October 2013: financial activities (6,200); and other services (2,100). The area's 2.4-percent job growth in financial activities was its strongest over-the-year rate of increase since October 2013. Nationally, employment in this supersector rose 1.2 percent from October 2013 to October 2014.

Manufacturing employment in Dallas-Fort Worth-Arlington area fell by 1,500 from October 2013, a

decline of 0.6 percent. All of the job loss occurred in Dallas-Plano-Irving which has registered annual declines since September 2012. In contrast, manufacturing employment nationwide rose 1.4 percent during the latest period.

Employment in the 12 Largest Metropolitan Areas

Dallas was one of the nation's 12 largest metropolitan statistical areas in October 2014. All 12 areas experienced over-the-year job growth during the period, with 5 exceeding the national average of 2.0 percent. The fastest rate of job growth was registered in Houston-Sugar Land-Baytown, up 4.3 percent, followed by Dallas, at 3.6 percent. The slowest rates of job growth were in Philadelphia-Camden-Wilmington (0.3 percent) and Detroit-Warren-Livonia (0.4 percent). (See [chart 3](#) and [table 2](#).)

Chart 3. Total nonfarm employment, over-the-year percent change, United States and 12 largest metropolitan areas, October 2014

Source: U.S. Bureau of Labor Statistics.

The New York-Northern New Jersey-Long Island area added the largest number of jobs, 123,900, since October 2013. Two other metropolitan areas gained more than 100,000 jobs over the year—Houston (120,600) and Dallas (111,900). Two areas added fewer than 10,000 jobs over the year—Philadelphia (9,100) and Detroit (6,900).

Two supersectors accounted for most of the job growth in the 12 largest areas. Professional and business services led employment growth in five metropolitan areas: Boston-Cambridge-Quincy, Chicago-Joliet-Naperville, Dallas, Los Angeles-Long Beach-Santa Ana, and San Francisco-Oakland-Fremont. (See [table 2](#).) Trade, transportation, and utilities recorded the largest gains in four areas: Atlanta-Sandy Springs-Marietta, Detroit, Miami-Fort Lauderdale-Pompano Beach, and Philadelphia.

Over the year, manufacturing recorded the largest loss of jobs in three areas—Chicago, Dallas, and Los

Angeles. Information lost the most jobs in two areas—New York and Washington-Arlington-Alexandria. Houston and Miami experienced no annual job loss in any supersector.

Technical Note

This release presents nonfarm payroll employment estimates from the Current Employment Statistics (CES) program. The CES survey is a Federal-State cooperative endeavor between State employment security agencies and the Bureau of Labor Statistics.

Definitions. Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period that includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2007 version of the North American Industry Classification System.

Method of estimation. The employment data are estimated using a "link relative" technique in which a ratio (link relative) of current-month employment to that of the previous month is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are obtained by multiplying the estimates for the previous month by these ratios. Small-domain models are used as the official estimators for the approximately 39 percent of CES published series which have insufficient sample for direct sample-based estimates.

Annual revisions. Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports that are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

Reliability of the estimates. The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding.

Employment estimates. Measures of sampling error are available for state CES data at the total nonfarm and supersector level and for metropolitan area CES data. Information on recent benchmark revisions for states is available on the BLS Web site at www.bls.gov/sae/.

Area definitions. The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget on December 1, 2009. A detailed list of geographic definitions is available at www.bls.gov/lau/lausmsa.htm.

The **Dallas-Fort Worth-Arlington Metropolitan Statistical Area** includes Collin, Dallas, Delta, Denton, Ellis, Hunt, Johnson, Kaufman, Parker, Rockwall, Tarrant, and Wise Counties in Texas.

- The **Dallas-Plano-Irving Metropolitan Division** includes Collin, Dallas, Delta, Denton, Ellis, Hunt, Kaufman, and Rockwall Counties in Texas.
- The **Fort Worth-Arlington Metropolitan Division** includes Johnson, Parker, Tarrant, and Wise Counties in Texas.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 1-800-877-8339.
